Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: as indicated in the Office Action dated 19 March 2006, Maeyama discloses the invention substantially as claimed. However, Maeyama fails to disclose gas soft nitriding treatment of the sintered metal sprocket and sprocket housing or induction hardening the teeth of the sprocket. Japanese patent application PAJ '981 discloses steam oxidation followed by a nitriding treatment of the metal vane in a rotary compressor, where the nitrided layer has thickness of at least 50 μm . The combination of the prior art references does not teach an integrated sprocket and housing with
